

The Academic Vocabulary List

- The words have been **formatted in a fashion** that inform you whether:
 - ✓ They are part of the **general** Academic Vocabulary List (bolded and underlined),
 - ✓ Are more **technical** and occur mainly in one domain (such as Law or Medicine) (italics)
 - ✓ They are not really an academic word, but are just a member of the word family (normal font).
 - ✓ The frequency of the word in academic texts is listed after each word, and the words/lemmas are listed in order of frequency; e.g. the word ***development*** occurs **63,509** times.
- For the technical words, we indicate in which sub-genre(s) they are most frequent.

The following sample entry shows how the list is organized:

*The “normal font” words are not academic or technical words, as defined above. But they are still included in the word family, for ease in learning.
